

♠ LeakTutor

Fix the leaks that cost you the pot.

A personalized GTO poker trainer that finds your specific mistakes — and drills them away. Live, installable, fully offline.

Investor Overview

daniel-willoughby.github.io/GTO-leak-fixer

THE PROBLEM

Players study endlessly — and bleed the same spots.

Training is generic

Today's tools are vast theory libraries. You grind abstract spots — never the hands you actually misplay.

No feedback loop

Most players can't name the three decisions quietly costing them the most money. So they never fix them.

Theory ≠ results

Solvers are intimidating, online-only, and built for pros. Knowledge rarely converts into better play at the table.

“

Millions play online; most lose. The gap is rarely knowledge — it's unfixed habits.

THE SOLUTION

LeakTutor turns your own play into a fix-list.

Not another spot library. A coach that knows your game.

1 • Bring your hands

Drill live spots or import your hand history — no setup, no spreadsheets.

2 • See your top leaks

LeakTutor auto-detects the exact positions and hand types you misplay most.

3 • Drill the fix

One tap launches a targeted drill for that leak — with a plain-English “why” on every hand.

A drill loop that feels like a coach, not a textbook.

GTO-correct answers

Real solver strategy, scored instantly — including mixed frequencies.

Plain-English “why”

Every decision is explained the way a coach would, not a solver dump.

Leak tracker

Auto-aggregates your mistakes by position and hand type.

One-tap targeted drills

Jump straight from a leak into the spots that fix it.

Daily challenge + streaks

A habit loop that brings players back day after day.

WHY IT'S DEFENSIBLE

The moat: personalization on top of real solver data.

Solver data, precomputed

GTO strategy from an open-source solver, baked into the app — credible answers with zero server cost.

Leak-fixing, not browsing

Detecting your weaknesses and drilling them is the wedge incumbents don't do well.

Offline-first PWA

Installs like an app, works on a plane, no app-store tax. Train anywhere.

Beginner → intermediate

A guided curriculum widens the funnel past hardcore grinders to the much larger learner market.

Everyone teaches theory. We fix your game.

MARKET & TIMING

A large, paying audience — and the tech just got cheap.

Big base

100M+ people play online poker worldwide, and the study-tool habit keeps growing.

Cheap solvers

Open-source solvers make credible GTO content affordable to produce — no compute moat needed to start.

Mobile-first

PWAs + offline play unlock training on the device players actually carry.

TAM

Global poker training & study spend

\$[—] B

SAM

English-speaking online cash & MTT students

\$[—] M

SOM

Reachable in 18 mo via poker communities

Sizing is a framework — drop in your segment figures. Player-base anchor is an industry estimate.

♠ LeakTutor • Investor overview • 2026

BUSINESS MODEL

Freemium subscription, near-zero marginal cost.

Free

The hook — get value in 30 seconds

- Full preflop GTO trainer
- Sample postflop spots
- Leak tracking + daily streak
- Beginner learning path

Premium

from \$[—]/mo • illustrative

- Full postflop corpus + bet-sizing
- Unlimited hand-history imports
- Postflop leak reports + study plans
- Cloud sync across devices

Unit economics: content is solved once and reused forever → marginal cost per user $\approx$ \$0 and gross margins scale like classic software.

The product is built and live. Next: users.

Live

PWA shipped & installable

4

drill modes: open, vs-raise, multiway,
postflop

Real

TexasSolver-validated strategy data

100%

offline-capable, no backend required

Already engineered

- Preflop GTO ranges (RFI, vs-RFI, multiway / squeeze)
- Postflop bet-sizing wired (Check / Bet $\frac{1}{3}$ / Bet $\frac{3}{4}$)
- Auto leak tracker → one-tap targeted drilling
- Spaced-repetition review of missed spots

De-risked: the hard part is done

A credible, offline GTO product already exists and works. Capital goes to growth and content depth — not proving feasibility.

ROADMAP

From working product to growing business.

NOW

Substance

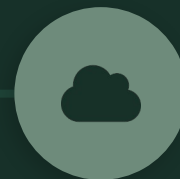

Expand the postflop corpus — more boards, bet-sizing, 3-bet pots.

NEXT

Retention

Postflop leak reports, structured study plans, challenges.

THEN

Reach

Accounts + cloud sync, mobile polish, social leaderboards.

LATER

Monetize

Premium tier at scale + B2B for coaches and poker sites.

THE ASK

Raising \$[—] to turn a product into momentum.

Pre-seed · use of funds over the next 12–18 months

~45%

Content depth

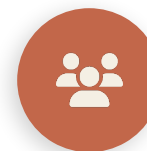

Expand the solver corpus across boards, sizings and pot types — the substance that justifies premium.

~35%

Growth

Acquisition through poker communities, creators and content; convert free users to paid.

~20%

Team

A second engineer and part-time poker content lead to ship faster.

Milestones this funds: launch premium · reach [—] active users · [—]% free→paid conversion · prove monthly retention.
